PROFILE SUMMARY

Software developer specialising in interactive web experiences, with **10+ games built across 2D and 3D** using Phaser and Three.js. Experienced in shipping gameplay features, client engagement campaigns and responsive React applications, with a strong focus on performance, clean code and polished user experience.

WORK EXPERIENCE

OCTECH 2026 - PRESENT
Software Developer
- Develop 2D and 3D web games for the **Playverra** platform, implementing gameplay mechanics, responsive layouts and performance optimisations.
- Deliver client engagement campaigns, including **lucky draws** and **embedded cashback games**, designed to make rewards playful and intuitive.
- Write modular JavaScript/TypeScript and collaborate through Git-based workflows.

PROJECTS

Interactive 3D Portfolio View Project
Three.js, Vite
- Animated portfolio featuring a 3D scene, a playable mini-game, theme switching and accessible navigation.

Emoji Memory Game View Project
React.js
- Memory game with randomised layouts driven by React state and reusable components.

Wikipedia Search App View Project
JavaScript, REST API
- Asynchronous search with responsive, styled results that open in new tabs.

Typing Speed Test View Project
JavaScript, Bootstrap
- Typing tool with a live timer, fetched paragraphs and real-time input validation.
